
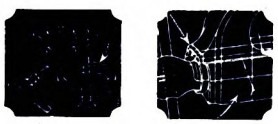
A Lifetime on the Bench

Rugged construction, strength where strength is needed, characterize Parker Superior Vises. In every detail the Parker is made to do a better job because it is better equipped to do it. These seven exclusive features listed below should mean a great deal to the Factory Executive desiring quality equipment. Are you using these advantages?

1 Base made to fit the bench instantly without cutting. In Swivel Base Type special locking feature grips 360 degrees of base, making base firm as stationary type.



2 Tension spring and set screw hold handle wherever placed. Can't slip and injure fingers.

3 Extra Strong Nut and Screw.

4-5 Improved outside saddle permits easy removal of screw for oiling. Solid steel bar cast into slide, and solid underportion give added strength.

6 Steel jaws carefully milled and pinned on. Can't work loose, yet easily removed if necessary. A Parker feature for 85 years.

7 Castings of Parkco Metal.

7 points of preference!

1. Steel Jaws carefully milled and pinned on. Can't work loose, yet easily removed if necessary. A Parker feature for 85 years.
2. Base made to fit the bench instantly without cutting. In Swivel Base Type special locking feature grips 360 degrees of base, making base firm as stationary type.
3. Solid steel bar cast into slide (SUPERIOR SERIES).
4. Solid under portion gives added strength, and improved outside saddle permits easy removal of screw for oiling.
5. Tension spring and set screw hold handle wherever placed. Can't slip and injure fingers.
6. Castings of Parkco Metal from our own foundry.
7. Screw and nut full size in proportion to size of Vise.

Vises used to be bought by the pound! That's when a man got 25¢ an hour and was happy about it.

Now Vises are bought *from the production angle*—how well they fit in with the natural working methods of the worker; how well they foster output from high-priced short-houred operators.

That's the way to consider Parker Vises. They are built by Vise Specialists. By a factory and organization with 87 years' experience. Consequently every feature of design, every element of construction and every possible care in the quality of materials, is incorporated to the end that may get more work from the men that use them.

And because they are made on large scale production schedules, you are asked to pay no more for their very evident, greater value.
